CURRENT POSITIONS

- Associate Research Professor, Business School, Universidad Torcuato Di Tella.
- Chair of the B.S. in Digital Technologies, Business School, Universidad Torcuato Di Tella.
- Director of the Artificial Intelligence Laboratory, Business School, Universidad Torcuato Di Tella.
- Independent Research Scientist, National Council of Scientific and Technical Research (CONICET).

RESEARCH INTERESTS

My main research topic consists in understanding and modelling the extraordinary degree of coordination exhibited by human beings while holding a conversation, both at a temporal level and along other dimensions of speech. The ultimate goal is to include this knowledge into spoken dialogue systems, aiming at improving their naturalness.

Besides, I seek contributing to the development of speech technologies in Spanish, by creating new resources, such as corpora and tools specific to this language. The goal is to encourage the virtuous circle: more willingness to use speech technologies – more interest in developing such technologies (in both the Academia and the Industry).
